### **HOW WE KNOW SMILE IS A SUCCESS**

Smile really helps with our customer experience is how well it fits into our website. It's seamless, and allowing customers to redeem their points at checkout has been a game changer for us. With our old program, it was a super involved process whereas now our customers are finding it easy and enjoyable to spend the points they've earned.

### **WHY WE CHOSE SMILE**

Before we had a program that was like pulling teeth to get anything done, but Smile is just so seamless to use for both us and our customers. It works well with our site, and there's no guesswork for the customer — it's just clean and makes sense with their shopping behavior, which can't be said at other big brands with big loyalty providers.

### **WORKING WITH SMILE**

With Smile, it was as easy as logging in, setting up the program and emails the way we wanted, importing our existing customers, and making it live. There was never a hiccup or anything that failed. It was the most seamless third party integration into Shopify that we had ever done. Best of all, there was no extra development required — it was just plug and play and everything worked great right away. Everything is just exponentially easier to get done or changed.
